Release of Prescription Information ePrescribe Program

ePrescribe is a way for your healthcare provider to send electronically an accurate, error free, and understandable prescription from the doctor’s office to the pharmacy. The ePrescribe Program includes:

- **Formulary and benefit transactions** give the health center provider information about which drugs are covered by your drug benefit plan.
- **Fill status notifications** allow the health care provider to receive an electronic notice from the pharmacy telling them if your prescription has been picked up, not picked up, or partially filled.
- **Medication history transactions** provide the health care provider with information about potential medication and past prescriptions. This allows health care providers to be better informed about potential medication issues and to use that information to improve safety and quality. Medication history data can indicate compliance with prescribed regimens, therapeutic interventions, drug-drug and drug-allergy interactions, adverse drug reactions, and duplicative therapy.

The medication history information can include medications prescribed by your health care provider at Centerpoint Health as well as other health care providers involved in your care. The receiving pharmacy is also required to protect this personal health information about you.

By signing this consent form, you agree your provider at Centerpoint Health may request and use your prescription medication history from other healthcare providers and/or third party pharmacy benefit payors for treatment purposes.
